

## SUMMER SOLSTICE THE COSMIC NECKLACE

*The Summer Solstice necklace is the result of a shared passion between the goldsmith Enric Majoral and the artist Antoni Taulé for the island of Formentera.*

*At the heart of this island lies one of the oldest monuments, the megalithic sundial of Ca na Costa, a symbol of time, which inspired this exceptional work. This necklace, through its materials and forms, captures the essence of the yearly cycles. Created by Enric Majoral and Antoni Taulé, the Summer Solstice integrates elements specific to the island of Formentera: pottery shards, stone fragments, seashells, porcelains in specific tones, and savina branches, representing the cosmic cycle. The gold, on the other hand, marks the division of the four seasons, symbolizing the sun, the star and the sea.*

*Limited to only 12 numbered editions and 3 artist proofs, each necklace is accompanied by an etching signed and numbered by Antoni Taulé. This jewelry piece draws its inspiration from cosmic energies and the four seasons, perfectly in harmony with the universe and natural forces. A mobile, unique piece marks each day on the calendar, thereby inscribing the temporal nature of the work in the infinity of the cosmos.*

*Rooted in both nature and art, Summer Solstice extends Antoni Taulé's exploration, where, through the exhibition, he delves into the four universal forces and entropy, a major concept in his work.*

Art Engagement Consulting is pleased to invite you to the private presentation of the *Summer Solstice* necklace by Taulé & Majoral, highlighted on the occasion of the exhibition:

In the presence of the  
Artist

# TAULÉ ENTROPIE

Thursday, April 3  
6:30 PM

Nouvelle Galerie  
S/Beaubourg  
35 rue Quincampoix 75004 Paris
